Report of the ICSSR sponsored two day National Level Conference on

IMPACT OF CLIMATE CHANGE ON AGRICULTURE

Organized by

Dept. of Geography

Vasundhara College Ghatnandur

Held on 24 & 25 January 2018

Introduction :

Climate change is an important factor of agricultural productivity as well as lives of the farmers. For this we need to understand the geographical and Climatic situation of Maharashtra. As high as 80% to 84% of the agriculture in Maharashtra is rainfed, which means that it totally depends on rainfall for its crops but there is a huge variability in rainfall in different regions of the state particular nature of agricultural development mainly depends on the natural phenomona and their effective environment, socio, economic, political dimensions, structural situation and the regional institutional set-up which are varing over geographical area.

With the wide intension and to contemplate on the important issues of "Impact of Climate Change on Agriculture" this title of the conference tried to focus on how the climate change strongly effects on the agricultural productivity as well as the crisis of the existence of the farmers Taking into consideration all these critical conditions Dept. of Geography Vasundhara College is organized ICSSR Mumbai sponsored two day national level Conference on "Impact of Climate change on Agriculture" held on 24 & 25 January 2018, at Ghatnandur, Tq.
